

Endura® 370GFKL

MIG welding gloves with 360° cut protection and a precise fit that maximizes touch sensitivity

These MIG welder gloves are built with tough goatskin leather on the outside and a fine-gauge DuPont™ Kevlar® interlock knit lining inside to allow for 360° cut protection and durability that minimizes interference with touch sensitivity. Their lining made with DuPont™ Kevlar® fiber offers heat and spark resistance in addition to cut protection. And their wide gauntlet cuffs are gusseted, making it easier to put them on and take them off.
